

**Class 2
Autumn
2018**

Science

We will be testing different materials- their strengths and properties. Finding out about John Dunlop and Charles Macintosh and their important contributions to the world. Investigating the need for healthy food, exercise and hygiene.

Art

We will be investigating different techniques to illustrate stories in different styles. Investigating the use of different materials. We will be learning about the techniques of different artists and applying these skills to our own work.

DT

We will be improving our designing skills. Making props to tell a story. We will evaluate our ideas against a set of criteria, whilst improving our technical knowledge.

Once Upon a Time...

This term we are learning about Fairy and Traditional Stories.

Geography

We will be learning how to improve our mapping skills both reading and making maps.

PE

We will be working on multi-skills, techniques and learning how to play team games.

English

We will be learning and improving story structure, simple grammar and punctuation. Developing understanding and fluency with reading through explanation and discussion.

Computing

We will be introduced to Scratch and developing coding skills. Learning to debug simple programs. We will continue developing how to stay safe online. We will investigate simple computer graphs.

Music

We will be developing listening skills, rhymes and song. We will be making music for different story characters and illustrating stories musically

History

We will be investigating lives and times of famous people including famous authors and historical figures such as Florence Nightingale.
